

Ravindran S

ravindrans.dev@gmail.com | +918248702358 | www.linkedin.com/in/ravindran-s | <http://github.com/ravindran-dev>

AI/ML Engineer specializing in computer vision, edge AI and scalable systems. Proven track record of building high-performance models and full-stack AI applications, with innumerable hackathon wins and open-source contributions.

EXPERIENCE

AI-ML Virtual Internship – AICTE & EduSkills

Full-Stack Development | Apr 2025 – Jun 2025 (10 weeks)

- Improved model inference workflow, reducing response latency by ~30% through optimized data preprocessing.

Drone Technology Team – CIT | NIDAR Competition

Object Detection in Drones | Oct 2025 – Dec 2025 (2 months)

- Accomplished ~96% detection accuracy with a model under 1 GFLOP for efficient edge deployment.

Open Source Contributor – AWS & SWOC (Cloud & Systems Development)

- Contributed code and documentation to AWS open-source projects (s2n-tls), enhancing stability.
- Navigated and resolved diverse challenges and pull requests during SWOC, helping reduce errors by ~90%, collaborating with distributed teams using Git.

PROJECTS

Machine Guard | Kotlin, Python, MQTT, Firebase, IoT Sensors ([Official Submission @ Ti forge 2026](#))

An IoT-based system for real-time industrial machine and environmental monitoring with ~94% model accuracy.

AI Soft Skill Coach | Python, Agentic AI, React, Firebase ([Developed for TGF 2.0 2026](#))

An interview coaching platform that analyses resumes and generates personalised mock interview questions.

AirMouse3D | Rust, Python, Firebase, Mobile Sensors (github.com/ravindran-dev/AirMouse3D)

Built a 3D air-mouse system enabling cursor control through hand gestures and motion data with 90% precision.

MicroDet | TinyGrad, PyTorch, DeepStream SDK, TensorRT ([Presented at NIDAR 2025](#))

Designed a lightweight (<1 GFLOP) object detection model using a NanoDet backbone with YOLO-style heads, attaining 96% accuracy and enabling real-time on-device inference using distributed computing.

GenuineGate | Go, Redis, Nginx, JavaScript (github.com/ravindran-dev/GenuineGate)

Built a real-time system to detect and block automated bots during high-traffic product drops using behavioural analysis and session scoring, achieving ~93% detection accuracy.

TECHNOLOGIES

- ✓ **Programming Languages:** C, C++, Python, JavaScript, TypeScript, SQL, Go, Rust, Lua, CUDA
- ✓ **Frameworks & Libraries:** React.js, PyTorch, Streamlit
- ✓ **Core Skills:** Generative AI (LLMs, RAG), Machine Learning Systems, MLOps, Computer Vision, NLP, Deep Learning, software design, GPU Optimization, Distributed Systems, Multithreading.
- ✓ **Platforms & Tools:** Linux, Python Ecosystem, Git, Docker.
- ✓ **Soft Skills:** Problem Solving, Effective Communication and Team Collaboration.

ACHIEVEMENTS

LeetCode Peak Contest Rating: 2071 (Knight badge holder)

Hackathons:

- ✓ AI for Sustainability Hackathon – Winner; awarded \$125 + Amazon vouchers worth 300 AED
- ✓ TI Forge Hackathon – Winner; awarded ₹50,000 cash prize
- ✓ TGF 2.0 TechSprint Hackathon – Finalist (Top 10 teams among 300 teams).
- ✓ ICPC 2025 Preliminary Contest – Global Rank 2605.

CERTIFICATIONS

- ✓ **Udemy Courses** – Full Stack Development.
- ✓ **NPTEL Certification** – Internet of Things (12-week course), got 75% score.
- ✓ **Cisco** – Python Fundamentals, Cybersecurity, Modern AI, Data Science, CCNA (90% – 100%)

COMMUNITIES

Open source contributor – AWS (s2n-tls)
Arch Linux Tester
SWOC – KitKat

EDUCATION

Chennai Institute of Technology (Sept 2024 – Present)
B.E Computer Science and Engineering (AI & ML)
CGPA – 9.24/10
